## Leverage the power of IoT and analytics to improve business operations

The Internet of Things (IoT) is all about inter-connecting devices, vehicles, and buildings (M2M) to collect and exchange data. Compiling data into business systems makes access simpler and easier to act on. Most IoT solutions require an ecosystem of partners. Charter Global works collaboratively with your team and technology partners to build IoT into your business model. We provide skilled resources and expertise to build your strategy, implement, and deliver your IoT solution with optimal performance.

### Resources and expertise to manage and integrate your IoT deployment:

- Build innovative, scalable, and secure IoT solutions
- Integrate legacy systems with new networks
- Connect devices with each other and to enterprise and cloud services
- Create a platform for collaborative development, production, and analysis
- Provide inter-operability and intelligent insight across your IoT value-chain

### Services

- **IT strategy & consulting** – Experience, technology partnerships, and proven methodologies ensure project success.
- **Application development** – Design, develop, test, implement, and seamlessly integrate applications across the enterprise.
- **Managed Services** – Scale resources to meet your requirements for a full end-to-end solution that improves operations.
- **QA testing & automation services** – Improve workflow and efficiency for DevOps, Big Data/BI, and analytics testing.

Drive innovation and business growth with the right strategy, technology, and people.
