Cloud Computing & Virtualization Solutions

Charter Global™
Strategy • Technology • Solutions

Make your transition to the cloud a smooth one with Charter Global.

Transitioning to the cloud offers benefits for companies of all sizes. It's secure and cost effective. Business becomes more mobile, and the cloud makes it easier to collaborate. But the transition also presents challenges which can range from security issues, managing the move from software to services, scoping the investment, and managing operations costs. Charter Global assesses your unique business needs and prepares your team for a smooth transition to cloud computing. Our cloud solutions improve availability of critical applications and streamlines app deployment and migration.

The Benefits for Your Business – More Agile, Flexible, and Optimized

Charter Global works closely with you on the plan to migrate your organization to the cloud.
We also provide cloud deployment and interface services to monitor progress and performance.

- Improved performance and availability of resources
- Automated operations decreases errors
- Improved application availability minimizes system downtime
- Improved level of business continuity helps to improve disaster recovery

- Centralized management improves confidentiality
- Simple to manage and less costly to own and operate – lower infrastructure, energy, and facility costs

Virtualization and Cloud Services

- Server virtualization
- Application virtualization
- Storage virtualization
- Desktop virtualization
- Software as a Service (SaaS)
- Infrastructure as a Service (IaaS)

- Platform as a Service (PaaS)
- Virtual desktop cloud solutions
- Cloud File Share system development
- Servers On Demand creation
- Backup care system development
- Disaster recovery system development

Cloud Assessment, Migration, POD and Deployment Services

With Charter Global your organization can be assured of a smooth transition of your IT applications to the cloud for improved scalability and flexibility. Cloud POD architecture can span multiple facilities and makes large deployments easier. Each POD is a set of isolated and secure resources -- computers, network, storage and users. Charter Global delivers pre-tested cloud PODs, and we help set up your cloud POD for development and testing for Big Data systems.

- Assessment and guidance on an optimal cloud strategy and roadmap
- Cloud Managed Platform – Cloud PODs for PoCs
- PaaS and IaaS platform selection
- Public, private, and hybrid option evaluation
- Cost analysis
- Guidance on adoption of robust migration / development methodologies
- Process oriented migration to cloud infrastructure

- Cloud specific design, templates, and checklists to ensure data security in the cloud environment
- Cloud provider agnostic and flexible approach of migration to cloud infrastructure
