

Charter Global

CASE STUDY – SharePoint Office 365 Migration High Tech Tracking Solutions Company

Rapid SharePoint Office 365 migration improves productivity and reduces labor hours for global technology company.

About Company

The client is a leader in tracking technology and solutions that give companies unprecedented visibility into their business operations. Its extensive portfolio of marking, tracking, and computer printing technologies, including RFID and real-time location solutions, generate actionable information and insight into an organization's products, physical assets, people and transactions.

Its solutions, including hardware, software and services, give physical things a digital voice, providing precise operational data into not only where things are, but also what condition they are in, enabling customers to respond to critical data in real-time to make more informed decisions

The Challenge

This global high tech company employs more than 7,000 people in 26 countries, and it has channel partners in more than 100 countries. Such a geographically dispersed workforce provides access to the best functional expertise from around the world, but it can also present huge challenges, especially in the area of productivity.

The client had implemented SharePoint On-Premises 2013, but found that the platform created a significant dependency on internal resources, including hardware, software, and staff. The client wanted to migrate to SharePoint Office 365, but lacked the necessary skilled resources to complete the job.

Solution

Charter Global assembled a team of specialized consultants and developers skilled in SharePoint Office 365 to augment the client's team. With the additional IT staffing resources and technology expertise provided by Charter Global, the team was able to address the client's productivity issues. Their collaboration on the project ensured that the migration from On-Premises to the cloud-based platform was completed smoothly.

Charter Global consultants also converted the client's vendor management system from a manual process to an automated system in Office 365, using Azure Virtual Machine for custom development.

Results

Using Charter Global's skilled resources, the client successfully migrated 50 SharePoint sites from On-Premises to the cloud platform in less than one month with no downtime. The newly automated vendor management system, custom developed using Azure Virtual Machines (VM), greatly improved efficiency and reduced labor hours, rework and cost. In addition, by using the Azure VM pay-per-use pricing model, the client was able to increase revenue on development machines. With the technology improvements, the client realized cost savings, increased productivity, improved business process efficiency, and experienced greater collaboration among its team members.

Why Charter Global

- Founded in 1994; Headquartered in Atlanta, GA with development centers in the U.S, India, and Serbia.
- Developed a portfolio of over 100 successful project implementations.
