

Charter Global At A Glance

Our Core Offerings:

Application Modernization and Cloud Adoption:

At **Charter Global**, we specialize in modernizing applications to harness the full potential of cloud computing. Our comprehensive approach includes cloud adoption, application services, and containerization, ensuring your business remains agile, efficient, and secure across any cloud environment, particularly **AWS** and **Azure**.

Data Modernization: Charter Global follows a structured data discovery methodology: Assess, Define, and Plan. Charter Global is passionate about delivering data ecosystems that are reliable, accessible, accurate, and fast. Our proven approach drives:

- AI and ML adoption
- Business process automation
- Real-time visualization and reporting

AI Agentic Platform: At Charter Global, we specialize in developing and implementing **AI Agentic Platforms** that transform how businesses operate. Our solutions leverage advanced AI frameworks and tools to create autonomous, goal-directed agents that enhance efficiency, adaptability, and decision-making.

With a team of technology professionals and a flexible global delivery model, Charter Global delivers scalable, high-quality solutions that drive digital innovation. At Charter Global, our engineers are experts at leveraging **Gen AI software development** tools to accelerate innovation. Headquartered in Atlanta, GA— with offices in India and Serbia—our engagements are locally managed and globally executed.
